

GATEWAY Program

The Digital Storefront Blueprint

1. Portfolio Task: The "Digital Storefront Blueprint"

A. Brand Identity:

- **The Professional Edge (USP):** Write your final promise using the formula: *"I help [Target Client] solve [Specific Problem] by [Your Unique Solution]."*

e.g. The Professional Edge (USP): I help Nigerian SMEs solve slow website issues by optimizing mobile user experiences.

I help Nigerian businesses solve poor online visibility by building SEO-driven content and search strategies that put them in front of paying customers.

- **The Hero Headline:** A one-sentence, high-converting headline for your primary professional profile.

e.g. The Hero Headline: Expert UI/UX Designer specialized in increasing mobile conversion rates for Nigerian businesses.

SEO Strategist Helping Nigerian Brands Rank Higher, Get Found, and Convert More Customers Online.

B. The Evidence (Portfolio Map):

- **Proposed Spec Work 1:** [Project Title] | [Niche] | [Problem Solved]

e.g. Proposed Spec Work 1: AccessBank Login Redesign | Niche: UI/UX Design | Problem Solved: Reduced login friction for mobile banking users.

GreenFresh Grocers Website Audit | Niche: SEO Strategy | Problem Solved: Identified and fixed technical SEO errors that were preventing the site from appearing on the first page of Google.

GATEWAY Program

- **Proposed Spec Work 2:** [Project Title] | [Niche] | [Problem Solved]

e.g. Proposed Spec Work 2: Health-Tech Blog Sample | Niche: Content Writing | Problem Solved: Explained telemedicine benefits in plain English for non-medical users.

"Understanding Solar Power" Blog Series | Niche: SEO Content Writing | Problem Solved: Simplified technical renewable-energy topics into keyword-optimized articles that non-experts could easily find and understand.

- **Proposed Spec Work 3:** [Project Title] | [Niche] | [Problem Solved]

e.g. Proposed Spec Work 3: Lagos Market Story | Niche: Video Storytelling | Problem Solved: Used fast-paced editing to show how a local market brand can look "global".

Local Business Google Ranking Case Study | Niche: Local SEO | Problem Solved: Used location-based keywords and Google Business Profile optimization to help a Lagos-based shop rank in local search results.

C. Storefront Logic (The Platform Choice):

- **Primary Platform:** (e.g., LinkedIn, Instagram, or WhatsApp Business)

e.g. Primary Platform: LinkedIn.

LinkedIn

- **Target Audience Alignment:** Explain why your chosen platform is where your specific clients are found.

e.g. Target Audience Alignment: My clients are B2B Tech Founders and SME owners who use LinkedIn to find professional consultants.

My clients are business owners and marketing decision-makers who use LinkedIn to research and hire professionals with proven, results-based expertise like SEO strategy.

GATEWAY Program

- **Inclusivity Plan (WCAG):** List one specific action to make your storefront accessible (e.g., "I will provide captions for all video samples").

e.g. Inclusivity Plan (WCAG): I will ensure every image in my portfolio has Alt-Text descriptions so that visually impaired clients can still understand my design process.

I will write clear, plain-language meta descriptions and alt-text for every image in my portfolio so that clients using screen readers can fully understand my SEO process and results.
